How to Create Dummy Users in Community

1. General Information

We can create dummy users without real email-id. Following are the steps to create dummy users.

 1.1. Login to Community as admin.

 1.2. Go to the Admin > Important Links

 1.3. Click on "Add a new user (via admin no verification required)"

 1.4. Provide the necessary details and press Register.

 1.5. Remember email-id and password for future use.

Note: These email-id (provided in 1.4) does not exist and in case we forget email/password, there is no way to recover the password. We recommend to use the email as username@answercart.com or username@queryhome.com so that it does not clash with any real email-id.
